Press release

PrismaLife exceeds sustainability targets

- ◆ CO₂ emissions reduced by 82 percent
- ◆ Significant increase in sustainable customer portfolio
- ◆ Strong expansion of the fund range for sustainability

Ruggell, August 22nd 2022. In its third sustainability report, PrismaLife AG, the Liechtenstein-based pension specialist, shows considerable progress in the implementation of its sustainability goals. Last year, the company reduced its CO₂ emissions by 82 per cent to 6.5 tonnes compared to the previous year, thereby significantly below the target values.

The reduction of CO₂ emissions is, on one hand, due to Corona-related travel restrictions, and on the other hand due to the change in the energy supply contracts. In addition, PrismaLife was able to improve its already high sustainability score of the investments in its own cover pool and now achieves a score of 7.25 according to the MSCI assessment method (2020: 6.7).

In addition, the share of sustainable investments held by insurance customers increased significantly from 45 million euro to 116 million euro. PrismaLife still sees potential for increases. Currently, every fifth contract on the customer side is sustainably invested. PrismaLife, which has been climate-neutral since 2020, sees further potential in these two areas in particular - its own investments and the portfolio of its customers - the decisive leverage for sustainable management. In the reporting year 2021, PrismaLife offered 65 sustainability funds. The specialist is striving to further expand this offer in accordance with strict selection criteria and has now increased its range of green funds to 82.

Sustainability as part of the corporate DNA

Also an employer, the niche provider focuses strongly on ESG values (Environment, Social, Governance). It allows its employees to work from home within the framework of country-specific regulations, offers family-friendly working time arrangements, provides health promotion programmes and other social benefits, for a stable and trustworthy cooperation. PrismaLife is also committed to various social projects at its location in Liechtenstein.

Holger Beitz, CEO of PrismaLife, explains: "Sustainable action has become part of our corporate DNA and is taken into account in all areas - from investments to the economical use of paper. Therefore, we are confident that we will keep our CO₂ footprint very low in the future even without the Corona effect."

ESG activities awarded gold

For its exceptional commitment to ESG criteria, the analysis firm Zielke Research Consult awarded PrismaLife 2021 gold. Among 50 insurance companies, PrismaLife ranks in the top group of insurance companies in Germany and Europe.
