Press release

PrismaLife's ESG report again with top international ranking

- ❖ Liechtenstein pension specialist moved up to 4th place in European comparison
- ❖ Significant increase in overall rating

Ruggell, 16 February 2023. PrismaLife AG has been awarded with a top ranking and a gold rating by the analysis company Zielke Research Consult for its sustainability reporting, also in the international ranking. The medal confirms the high level of transparency and detailed reporting also for the year 2021. PrismaLife was able to improve its score in all three ESG categories (Environment, Social and Governance). In particular, it achieved high scores in the "Environment" and "Social" assessment. In a European comparison, the Liechtenstein pension specialist is ranked 4th out of 12 much larger providers.

«With 4th place, PrismaLife has achieved a very strong result - especially considering that global players such as AXA and Allianz also took part in the ranking. As a niche provider and specialist in the international comparison, I am particularly proud of this. My thanks go to the entire PrismaLife team, which earned this great ranking with a lot of commitment» says Holger Beitz, CEO of PrismaLife. «Economically and ecologically conscious action is part of Liechtenstein's DNA. PrismaLife's success in the ranking shows that we are also implementing the country's political sustainability strategy in an entrepreneurial way and are also among the pioneers in international competition."

«With the disclosure of relevant investment criteria, we have reached another milestone on the path to transparent sustainability communication» adds Volker Schulz, COO of PrismaLife. «Capital investment is the key towards more responsible and environmentally conscious action. As PrismaLife, we identified this enormously important field of action years ago and align our cover pool to strict ESG criteria» adds Volker Schulz, COO of PrismaLife. «As a result, we now save more than 55 percent of emissions compared to a standard portfolio. »

Zielke Research Consult GmbH has been conducting an annual analysis of the sustainability reports of German and European insurers since 2018. This provides the companies with a benchmark comparison. At the same time, the ranking provides policyholders with a basis for assessing how sustainably their funds are invested.
